INTERNSHIP PRESENTATION

Content Management System Development and Support at 7Con Technologies Pvt. Ltd.

STUDENT NAME

Hammad Siddiqui

ENROLLMENT NUMBER

2410031131

PROGRAM & SEMESTER

B.Tech CSE — Batch 2024–28

ORGANIZATION

7Con Technologies Pvt. Ltd.

ROLE

IT Intern

DURATION

1 Jun 2026 – 31 Jul 2026

Introduction

This presentation summarises the internship undertaken as an IT Intern at 7Con Technologies Pvt. Ltd., an ISO 9001:2008 certified content management solutions company based in Noida, from 1st June 2026 to 31st July 2026.

The internship offered hands-on, industry-level exposure to content management systems (CMS), website content operations, and IT support workflows — the core of 7Con's business as “the Content Management Experts.”

This deck covers the organisation, the problem addressed, objectives, scope, tools used, architecture, methodology, and outcomes of the internship.

MONTHS OF INTERNSHIP

IT

INTERN ROLE

ISO 9001:2008

CERTIFIED ORGANISATION

Organization Profile

7Con Technologies Pvt. Ltd.

"The Content Management Experts" — ISO 9001:2008 Certified Company

Tower-A, I-Thum, Sector-62, Noida, U.P.

Industry

Content Management / IT Services

Specialisation

Designing, implementing, and maintaining CMS platforms and digital documentation systems

Client Approach

Structuring, organising, and delivering large volumes of digital content efficiently and reliably

Problem Statement

Organisations generate large volumes of digital content across websites, portals, and internal systems. Without a structured content management process, this content becomes difficult to organise, update, retrieve, and maintain — leading to inconsistencies and inefficient workflows.

The core problem addressed during the internship:

Supporting the organisation's content management operations — ensuring content across assigned platforms was accurately uploaded, formatted, updated, tested, and maintained in line with quality requirements.

Project Objectives

1

Gain practical exposure to real-world content management systems and IT support workflows

2

Assist in uploading, formatting, and editing content on client websites through the CMS

3

Identify and fix formatting issues, broken links, and display inconsistencies across pages and devices

4

Support data entry, file organisation, and documentation tasks as part of daily operations

5

Develop proficiency in day-to-day content workflow tools and strengthen professional workplace practices

Scope of the Project

The scope of the internship was limited to the tasks and responsibilities assigned by the organisation over the two-month duration.

WITHIN SCOPE

- ✓ Uploading and formatting content on the CMS
- ✓ Fixing minor layout and display issues
- ✓ Testing pages across browsers and devices
- ✓ Entering and organising data
- ✓ Maintaining internal documentation

OUTSIDE SCOPE

- ✗ Independent client-facing decision-making
- ✗ Ownership of major architectural changes
- ✗ Direct client negotiations or contracts

Technologies and Tools Used

CMS Platforms

Uploading, editing, and publishing website content

HTML & CSS

Fixing layout, formatting, and display issues

Browser Dev Tools

Cross-browser and cross-device testing

Spreadsheets

Data entry and file / record organisation

Ticketing Tools

Logging issues and tracking task status

Communication Tools

Daily status updates and coordination

System / Workflow Architecture

Content is authored in the CMS admin panel, stored in a backend database, and delivered to end users through the web front-end. Each task moved through this five-step pipeline before being marked complete — ensuring accuracy and consistency before content reached end users.

Methodology

1

Daily Briefing

Short status update or task briefing from the reporting manager each morning

2

Execution

Content uploads, formatting fixes, QA testing, or data entry as assigned

3

Logging & Fixing

Issues found during testing were logged in the internal tracker and resolved

4

Review & Feedback

Completed tasks submitted for mentor review; feedback incorporated before closing

This routine of briefing, execution, testing, and review repeated throughout the internship — enabling steady improvement in accuracy and speed of work over time.

Expected Outcomes

Improved accuracy, consistency, and quality of content across platforms worked on

Hands-on familiarity with CMS-based upload, formatting, and publishing workflows

Practical QA experience — identifying and fixing display issues across devices

Comfort with day-to-day IT-office tools: ticketing, spreadsheets, shared drives

Stronger teamwork, time management, and professional conduct

Successful completion of the internship, certified by 7Con Technologies Pvt. Ltd.

Internship Completion Certificate

7Con Technologies Pvt. Ltd.
THE CONTENT MANAGEMENT EXPERTS
ISO 9001:2008 CERTIFIED COMPANY
